BALL CONSTRUCTION

1. COVER
The cover material provides superior grip and soft feel while maintaining our rigorous standards for material strength and abrasion resistance.

2. CARCASS
The carcass provides structure, shape and protection for the inner components.

3. WINDINGS
Windings add structural integrity and durability to the construction of the ball.

4. BLADDER
The high-end bladder maintains the ball's air pressure for proper inflation and extended air retention.

LAMINATED

Laminated construction uses leather or composite panels. These panels are fixed onto a rubber carcass by hand in order to provide athletes with the highest quality basketballs available. The versatility of this ball construction gives players the ability to take their game to the next level.

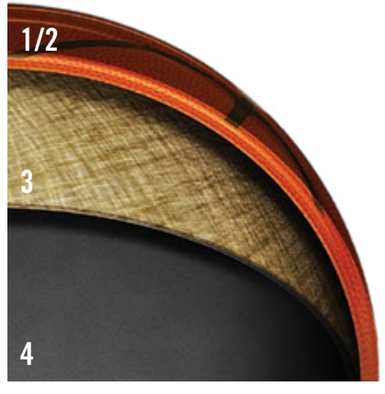

⌖ **Target: Competitive Play**

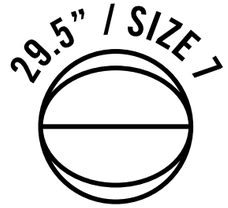

MOLDED

Molded construction is used on outdoor basketballs and provides increased design capabilities and a wide range of available color and graphic options.

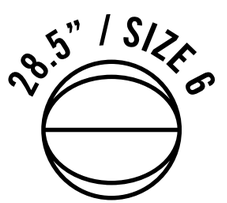

⌖ **Target: Recreational Play**

ICONS

An indoor ball is designed exclusively for indoor playing surfaces. These balls are constructed with leather or high-end composite covers.

Outdoor basketballs have a durable cover that can withstand rougher playing surfaces.

Indoor/outdoor basketballs are suitable for all types of playing surfaces.

Balls approved by the National Federation of High School Associations.

Colored rubber with a unique color mixing technique that makes each ball different from the next.

Ability to add custom laser engraving decoration to specified styles.

Ability to add custom digital print multi-color decoration to specified styles.

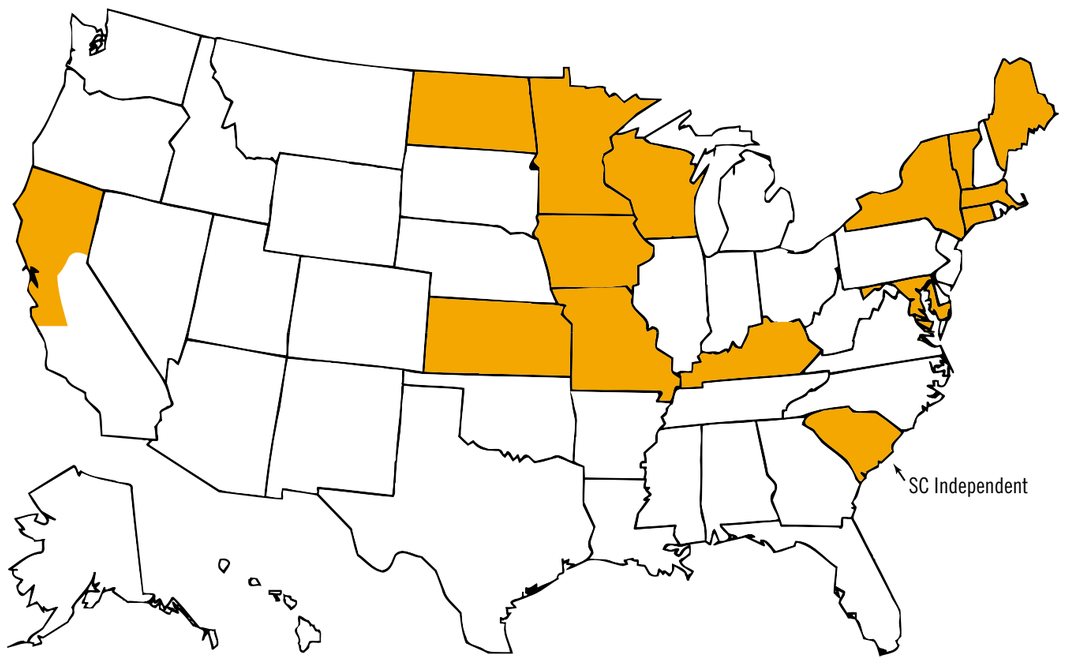

When we developed the first ball in 1894, we didn't follow the competition, we set the standard. We didn't just create the ball, we built a reputation, a legacy. We don't forget where we started, but we plan for the future. We never stop innovating; never stop searching for opportunities to improve, always adapting to meet the changing needs of the player and the game.

For every W and every L, the ball is the constant—something you can always rely on. It holds dreams to something better, an opportunity to escape reality, and it unlocks potential on any stage.

No matter the stakes, time, or place, we play our best with TF™.

TF™ MODEL M™

LEATHER GAME BALL

INDOOR

LASER ENGRAVED

The ball the pros play with? Yeah, this is the one.

When we developed the first basketball in 1894, we didn't follow the competition - we set the standard. Over 125 years later, we continue to evolve and innovate alongside the game we've grown with since day one.

Built for a game that champions originality and history equally, the Spalding TF™ Model M™ is constructed from genuine Horween leather - made exclusively for the hardwood. The grip turns butter-soft the more it's used so it can bounce, cross, float, and spin in the hands of the legends who hoop with it.

Bring out the pro in you with the Spalding TF™ Model M™.

KEY FEATURES:

- SUPERIOR GRIP: The Model M™ is wrapped in full-grain, premium leather that softens for superior handling the more it's broken in

- SHOOTER'S TOUCH: Spalding Shooter's Seam™ is designed for instant ball recognition, exceptional control, and precise accuracy

- ELITE PERFORMANCE: Rotationally balanced butyl bladder provides ultimate air retention, and nylon windings provide excellent structural integrity
